

Advanced Nursing Practice Outcomes

Graduates of the Master's of Science in Nursing program will be able to:

1. Demonstrate the synthesis of expert knowledge for advanced nursing practice in rural communities.
2. Evaluate theory and research in nursing and related disciplines for their contribution to advanced nursing practice and professional role development.
3. Function as a leader in the analysis and advancement of health care.
4. Utilize research methodology and advanced nursing practice knowledge to identify client needs, propose interventions at the advanced practice level, and evaluate effectiveness of solutions and alternatives.
5. Work within complex organizational and political systems to influence rural health care delivery.
6. Communicate, collaborate, and consult with clients and colleagues in nursing and other disciplines to meet rural health care needs.
7. Interpret the purpose and role of advanced nursing practice to professional colleagues and consumers.
8. Integrate ethical and legal principles into advanced nursing practice.
